CONFIDENTIAL - MOBILE APPLICATION PENETRATION TEST REPORT
AUDIT STANDARD: OWASP MSTG & PTES
OWASP & PTES Mobile Penetration Testing Report
Target Application: InsecureBankv2 (com.android.insecurebankv2) | Platform: Android 11
1. Executive Summary
A comprehensive mobile application security review was conducted on the InsecureBankv2 training application. Testing was performed in accordance with the Penetration Testing Execution Standard (PTES) and the OWASP Mobile Security Testing Guide (MSTG). The audit uncovered 5 confirmed vulnerabilities spanning insecure data storage, weak cryptography, cleartext network traffic, and unauthenticated exported activities.
2. Vulnerability Findings Matrix
ID VULNERABILITY TITLE SEVERITY OWASP STATUS
VULN-01 Plaintext Credentials in SharedPreferences HIGH (7.5) M2: Storage CONFIRMED
VULN-02 Hardcoded Cryptographic Master Key CRITICAL (9.1) M5: Crypto EXPLOITED
VULN-03 Cleartext HTTP Login Credential Transmission HIGH (7.4) M3: Network CAPTURED
VULN-04 Authentication Bypass via Exported Activity HIGH (8.8) M1: Platform BYPASSED
Lead Security Auditor: Manoj (Mobile Penetration Testing & Ethical Hacking Lab)
Sign-Off Date: October 26, 2026 | Deliverable Status: APPROVED & SUBMITTED
